

Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP1

☒ All GE foods should be labeled so I am informed and have a choice.

☒ GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing to determine the long-term impacts to human health and the environment.

(Additional Personal Comments:)

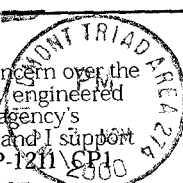

*Let's be real! There are so many ecological, environmental, health, and ethical reasons against GE foods. I am a vegetarian so these GE foods hurt me! Your meat is already tainted by chemicals and drugs so leave our REAL FOOD ALONE!!!*
